

A RARE DEVALUATION: 250 LEI 1935

ABSTRACT

The Romanian numismatic works frequently mention the devaluations of nickel coins from the years 1936–1938, but there is no information about other devaluations.

Such a rare devaluated piece is 250 lei 1935. The causes of its devaluation could be: the official devaluation of the State's Mint, intentionally — with speculative numismatic purposes (much unlikely) or by mistake, together with the nickel pieces.

Anyhow, the devaluation of the 250 lei 1935 piece is a rare one.
